

Контроль защищенности Linux – систем.

Вместо Scap-workbench - oscar.

1. Установите пакеты openscap-scanner, openscap-utils и bzip2.

2. Установите scap-security-guide .

```
$ sudo apt purge ssg-base
```

```
$ wget https://deb.debian.org/debian/pool/main/s/scap-security-guide/ssg-debian\_0.1.76-1\_all.deb
```

```
$ wget https://deb.debian.org/debian/pool/main/s/scap-security-guide/ssg-base\_0.1.76-1\_all.deb
```

```
$ sudo apt install ./ssg-base_0.1.76-1_all.deb ./ssg-debian_0.1.76-1_all.deb
```

3. Проведите сканирование системы.

```
oscap xccdf eval --report /tmp/xccdf_report.html \  
--profile xccdf_org.ssgproject.content_profile_standard \  
--results /tmp/xccdf_results.xml --fetch-remote-resources \  
/usr/share/xml/scap/ssg/content/ssg-debian12-ds.xml
```

4. Проверьте результат сканирования:

```
firefox /tmp/xccdf_report.html
```
